RE: SCP/Carlstadt Superfund Site

Dear Mr. Basso:

Please find under separate cover the First Operable Unit Feasibility Study prepared by the potentially responsible parties at the above captioned site pursuant to United States Environmental Protection Agency oversight. I believe that this document is in the form required by the Agency and, to the extent possible, reflects the work which the Agency has caused the PRPs to perform. Moreover, I believe that it incorporates the comments which the Agency has ordered the PRPs to incorporate to the extent that these comments were received in a timely manner.

As you must know, the PRPs do not agree that all of the work required by the Agency in connection with this First Operable Unit Feasibility Study was necessary or appropriate. By the same token, the PRPs do not agree that all of the comments received from the Agency for incorporation in this document are either correct, accurate, or appropriate for inclusion in this document. However, pursuant to the instructions of the Agency, even the work and comments with which the PRPs disagreed, have been included in this document.

Yours very truly,

*H. Gilbert Weil*
